Clothing may be cleaned in an ordinary washing machine using the hot cycle. The AIDS Virus is killed by household bleach and the area in which any spills have occurred should be disinfected using one part bleach diluted with 10 parts water, caution should be exercised as bleach is corrosive and can be harmful to the skin.
5. If direct contact with another persons blood or other body fluids occur, the area should be washed as soon as possible with ordinary soap and water. Clean cold tap water should be used if the lips, mouth, tongue, eyes or broken skin are affected and medical advice sought.
